

engineering excellence

TFS EDGE is a brand-new hybrid broking experience designed to challenge accepted ideas in the new market place. Beginning with repo, TFS EDGE provides clients with a complete range of trade ideas, together with unrivalled liquidity, efficient execution and full straight-through-processing.

We add value to our clients through:

Our scale of operation

TFS EDGE is part of the Tradition Group, the interdealer broking arm of Compagnie Financière Tradition. Tradition operates in 29 countries and is one of the world's leading interdealer brokers in OTC financial- and commodity-related products. Our proven network enables the efficient execution of both vanilla and complex trade structures of significant size to be undertaken with confidence and sensitivity.

Our market-leading innovation

TFS EDGE prides itself on its ability to disrupt established ideas and develop new ways of doing business. The team behind TFS EDGE was the first to offer buy-side clearing of repos via multiple counterparties and was also responsible for the creation of an unique offering delivering new technology and thinking to the OTF space.

Our high degree of integrity

We conduct every aspect of our business with honesty, and ensure that all of our clients are treated equally, fairly and with respect. We transact our business with skill, care and diligence. We are transparent in our business dealings and operate within the Tradition London Conduct Risk Management Framework which includes full compliance with the SMCR Individual Conduct Rules and the Fit and Proper requirements.

Our level of experience

The TFS EDGE team has decades of broking and trading experience in the short-term markets. Our first-hand knowledge and understanding of the challenges created by market stresses and events over the years means we are ideally placed, in some instances to pre-empt, but always to react positively and develop effective solutions for our clients.
